Company: 40HRS

Location: Vietnam

Category: architecture-and-engineering

Job Description

About the job

Responsible for the NLP related R&D, mainly including:

- Language understanding, including intention recognition, emotion recognition, FAQ, etc.
- Build an intelligent dialogue system, including mining questions and answers.
- Multilingual text generation such as products' copy, dialogue summary, email reply, etc.
- Machine translation, including the translation of product titles and details, IM and other scenarios.
- Cross-lingual search, including cross language matching, cross-lingual vector retrieval, etc.

Job Requirements

Qualifications

- At least 3 years of work experience in related field
- Candidates who have practical experience in NLP (intelligent dialogue, machine translation, etc.) are preferred.
- Familiar with at least one computer programming language, including but not limited to C/C++/Java/go/python.
- Candidates who have published high-level papers are preferred, including but not limited to ACL, EMNLP, COLING, AACL, IEEE TASLP, etc.
