

Design Engineer

[Apply Now](#)

Company: Inknoe Pte Ltd

Location: Vietnam

Category: architecture-and-engineering

Inknoe is a forward-thinking company dedicated to innovating in the Edtech space. We are currently embarking on an exciting project and are seeking a talented Design Engineer with a keen eye for design and a passion for creating seamless user experiences. This unique position bridges the gap between design and development, ensuring our web applications are not only functional but visually compelling.

As the Design Engineer, you will play a pivotal role in our development process, acting as the vital link between our marketing and engineering teams, combining the art of design with the art of programming. You will collaborate with the development team to implement user interface and website designs and ensure an inviting, easy-to-use and seamless user experience. This role demands a blend of technical proficiency in frontend development and a strong aesthetic sense to deliver intuitive and visually appealing user experience. We expect you to take an active role on both UI/UX & technical implementation and defining how the application looks as well as how it works.

***Important: How to Apply**

Stand Out From the Crowd: Show Us Why You're Inknoe's Perfect Match

This isn't your average application. We want to hear your unique story! Write something specifically for this position that tells us why you're a great fit for the role and how your skills and experiences will propel Inknoe forward.

Here are some areas where you can shine:

Projects you're proud of Showcase projects you designed and built solo. These demonstrate your initiative and technical prowess.

Fuel Your Passion What gets you fired up? Highlight the specific aspects of this role that excite you the most.

Master of Explanation Can you break down complex topics into easy-to-understand concepts? Share examples of your teaching skills, it shows exceptional communication abilities.

The process

We'll spend a 2 weeks reviewing applications, and we'll let you know whether we'd like to invite you to the interview process.

The process: Introduction call (a short call to get to know each other) -> Take-home project (We will invite some to complete a small technical project, paid.) -> In-depth interview (A longer interview)

Responsibilities

Design and implement UI/UX for web application and website

Work closely with the engineering team to grasp the functionality and structure of web components developed with Next.js.

Apply Tailwind CSS to improve and beautify the user interface components, ensuring responsiveness and consistency with design guidelines.

Adapt designs from reference applications and websites, incorporating best practices and innovative design solutions.

Proactively research and monitor trending apps/designs to gather inspiration and best practices in UI/UX.

Communicate effectively with both designers and developers to bridge any gaps and ensure a cohesive and visually appealing product.

Maintaining brand consistency throughout the design.

Requirements

Requirements

You love to design — in code. You've got a track record of creating beautiful experiences for the web, and code is your design tool.

Proficient in Frontend development using Next.js and styling with Tailwind CSS.

Proficient using npm packages.

A strong portfolio demonstrating expertise in web design and development, specifically with projects using Tailwind CSS.

Excellent understanding of responsive design principles and UI/UX best practices.

Strong analytical/learning skills to study and derive insights from reference apps and designs.

Effective communication skills, with the ability to articulate design and development concepts clearly.

Self-motivated with a passion for design and a keen eye for detail.

Experience in working collaboratively in a fast-paced, team-oriented environment.

Good understanding of SEO principles and ensuring that application will adhere to them.

Benefits

A dynamic and collaborative work environment where your contributions make a difference.

The opportunity to work on innovative projects with a talented global team.

Flexible, remote working environment.

Competitive salary and benefits package.
