Company: People Profilers

Location: Ho Chi Minh City

Category: other-general

Job Description:

Position: Solution Designer

Location: Ho Chi Minh City, Vietnam

Company Overview:

People Profilers Vietnam is a leading recruitment and HR solutions provider in Vietnam. We specialize in finding the best talent for our clients and helping them achieve their business goals through effective HR strategies. Our team is made up of experienced professionals who are passionate about helping companies grow and succeed.

Job Description:

We are on behalf of our Client, an International Tech Hub, seeking a highly skilled and experienced Solution Designer to join the team in Ho Chi Minh City, Vietnam. The team revolutionises and enhances the end-to-end payment acceptance experience for customers and colleagues and delivers a digitized self-service experience along with the latest product innovations, all supported by market leading back-office systems and processes.

Key Responsibilities:

Design large scale systems, interacting with other internal large-scale systems.

Manage & execute the design, development and testing of customer / colleague and technology features and in line with service priorities.

Lead brainstorming sessions to develop potential solutions for business needs, ideas or problems.

Present potential solutions to various stakeholders.

Ensure tech stacks and frameworks being proposed are aligned with architectural direction.

Define, create and present detailed Solution Design documentation to a diverse group of stakeholders (Architect forum, Design forum, Squad members...).

Design solutions around risks, privacy, governance, compliance, etc.

Collaborate with the software engineering teams and project stakeholders to continually deliver customer value.

Qualifications:

Experience of **10+ years in application design** and / or development roles and **15+ years in the Technology field** and industry.

Strong stakeholder management and communication skills

Deep understanding of **microservices** architecture including designing and architecting microservices in large scale systems and complex environments

Understanding of DevOps including the knowledge of testing automation, **AWS/Azure cloud** , **APIs** and microservices

Solid experience in designing and developing RESTful APIs and microservices-based system, Event-Driven Architecture (Kafka)

Experience with **Java** (Spring boot, Spring Data, Java 8 &11,...), **JavaScript/Typescript** (NodeJS, ReactJS,...)

Experience on working with containerised application and container orchestration (e.g. Docker, K8s...)

Understanding CI/CD and its related tools (e.g. Harness, Jenkins...)

Strong understanding of **Application Security**

Experience in service integration, SDLC

Experience on applying MS Architecture Patterns (e.g. BFF, API Gateway, Circuit breaker,

Saga,...)

Nice to have:

Knowledge and experience in the Banking domain

Solid experience in Agile development environment

AWS certification / Azure certification

If you are a highly motivated and results-driven individual with a passion and a desire to be part of a dynamic and growing company, we want to hear from you! Please submit your application and resume for consideration.

Required Skills:

Design
